EMEC

THE EUROPEAN MARINE ENERGY CENTRE LTD

ABOUT EUROPEAN MARINE ENERGY CENTRE (EMEC)

EMEC is the world's leading centre for demonstrating wave and tidal energy converters in the sea and is pioneering the development of a green hydrogen economy and smart local energy systems.

Set up in 2003 to kick start an ocean energy sector in the UK and boost economic development in the Highlands and Islands, over the years it has grown and diversified. The unprecedented activity that has taken place in Orkney due to the presence of EMEC has been a catalyst for economic development, creating jobs and a world-leading supply chain now exporting skills and knowledge around the globe.

EMEC's main office is in the ORIC Centre in Stromness, but they also have an office in Kirkwall. They employ 84 members of staff across the whole organisation ranging from a mixture of full and part-time.
