ROVING EYE  
ENTERPRISES

## ABOUT ROVING EYE ENTERPRISES

Roving Eye Enterprises are a marine survey business, providing their expertise to a wide range of businesses. They operate underwater cameras onboard Remote Operated Vessels (ROVs) which are operated off of workboats. There are also other underwater sensors mobilised on the vessels for specific purposes depending on the workscope supplied by the client.

The company is based in Orphir and they employ five members of staff.

### CAREERS

Some of the career options available include:

Marine Operatives:

Skippers  
Deckhands  
Engineers

Survey Personnel:

ROV Pilots  
Technicians

### SKILLS

Some of the additional skills you might need to work for this company include:

ROV Pilot's requires a full knowledge of electronics and mechanics, as well as the skill to pilot the ROV.

MD requires all the above skills plus the ability to manage the vessel's maintenance regime, crew safety certificates, full knowledge of HSE for the industry. Risk assessments are carried out for every job, and must also be able to talk to clients about their needs and pricing.

### QUALIFICATIONS

To work on deck, all positions require sea survival and medicals as a bare minimum. First Aid and Firefighting training is also required in addition to basic certificates.

ROV Pilots:

An Electronics Degree is preferable  
Plus the offshore certs to allow them to work on vessels.

Skippers:

MCA recognised qualification to allow them to skipper commercial work boats.

### OPPORTUNITIES

On the job training is available, as they regularly take on Deckhands who can be trained up to Skipper, either by them or a stepping stone to other marine operators.
