ABOUT RM COMPUTING (ORKNEY) LTD

RM Computing provides IT support services to small to medium sized businesses, providing end to end IT management covering Cloud Technologies, Communications Solutions, Infrastructure and Security. They are based in Hatston in Kirkwall and employ 11 people.

Over recent years they have grown their support team, meaning the jobs they have recruited for have mainly been technical only roles. As the business continues to grow, they expect to offer opportunities within business and administration, including administrative and marketing roles.

They've had great success in recruiting candidates locally who have studied computing at Orkney College UHI. This includes those who have studied at HNC, HND and Degree level.

CAREERS

Some of the career opportunities that are available with RM Computing include:

Trainee IT Support Technician
IT Support Technician
Senior IT Support Technician
Compliance Technician

SKILLS

Some of the skills needed to work here include:

Communication
Customer Service
Teamworking
Technical Skills (Microsoft technology, IT Hardware, Networking, Backups, Cyber Security)

QUALIFICATIONS

RM Computing do not set specific qualification requirements when recruiting for staff, they are most interested in how an individual will fit in with their culture and working practices.

Any college or university qualification in technology would be of benefit. They also work closely with Microsoft technologies so any qualifications or certifications from Microsoft will be of interest.

If you have worked amongst the technology around you, for example adjusting settings on your home router or building your own PC, they would be interested in hearing about that at an interview.

OPPORTUNITIES

Work placements are available when capacity allows.

They have also offered **Modern Apprenticeships** to new employees, along with **industry specific training courses**.
