APPRENTICESHIP FOCUS

MODERN APPRENTICESHIPS

A Modern Apprenticeship can be undertaken by a school-leaver who is aged 16 years and over. You will be a full-time employee and your training will be undertaken while you work, meaning you can apply what you learn in a practical way.

WHAT CAN I STUDY?

There are over 100 types of Modern Apprenticeship available, including Agriculture, Business & Administration, Computing, Construction, Engineering, Hairdressing, Healthcare, Children & Young People, Sport & Leisure and many more.

You can find details of all frameworks on apprenticeships.scot

QUALIFICATIONS

The level of qualification depends on the subject you study.

A Modern Apprenticeship can also act as a stepping stone onto a Graduate Apprenticeship and help with your career progression.

HOW WILL I LEARN?

You will learn through working as an employee. You will have an agreed training plan and you will learn from the experienced workers around you.

Your training will cover the core skills of communication, teamwork, problem solving, numeracy and IT.

WANT TO KNOW MORE?

If you want to find out more about Modern Apprenticeships, speak to your Guidance Teacher or Careers Adviser.
